KYLA APP
- It is a Mobile App to know your laws
- Recommended actions
- Contact lawyer with location and details
- Paid and Unpaid Feature
- In Development

Developed the backend in NodeJS, Express, MongoDB, Node mailer, Geolocation, Security for XSS and NOSQL Injection

Global Aviation System
- For Central African Republic
- In Development

I am working on parts of backend Node JS, Express, Swagger, Sequelize cli & Azure SQL

Dynasty Unleashed Models
- Modeling agency App for Fashion designers and marketers
- Users can register, create profile, add people and hire models at will

Developed part of Front-End in React/React-Native & part of Deployment to Firebase & Google Play

Dokkani.co

- Ecommerce Mobile App.
- User can register, select products, add products to cart.
- User add products to wish list and checkout.

React/React-Native, Expo, Redux, Node JS, Rest API, Word Press API, Woo Commerce API, Native Base

	• Project was abandoned on last stage due to funds not provided and outsourced to someone else. • My Version	
	Yogurt App • Step-by-step guide to home crafted authentic Yogurt and Kefir. Take the directions on your phone. Make Yogurt and Kefir at home and communicate.	Developed part of Front-End in React/React-Native, Expo, Native Base
	SmartsAid • NGO App for refuges	React/React-Native, Expo, Redux, Firebase, Rest API, React Native Elements
2018 - FYP	Currency Recognition & Conversion • Developed an app where users can scan currency note and it will tell which currency it is and how much is it and show the exchange rate in USD.	Android, Java, Open CV, Rest API, MATLAB
2014 - 2018	Content Management Systems	Java, C#, MSSQL
	Gym - Point of Sale	PHP, HTML, CSS, MySQL
2010	**RuneScape RPG** • Created bot script for the game called RuneScape. The bot played the game for you.	Java
Portfolio Projects	**DevCamper API** • Bootcamps API • One can register as a User or Publisher and login also. • Publisher can create Bootcamps. • Admin and Publisher can add courses and perform various CRUD operations. • Users can comment on Bootcamps and update their profile, add picture, and reset password.	HTML, NodeJS, Express, Mongoose, MongoDB, Node mailer, Security for XSS and NOSQL Injection
	DevConnector • Social Media for developers where users register. • Create profile, create posts, add comments and like and unlike them.	React, Redux, CSS, MongoDB, Mongoose, Express, NodeJS, Heroku
	SmartBrain • Smart Brain an app with face Recognition. • Users can register, login and submit images via URL. • The AI recognizes the face in the picture and draw a border around.	React, Redux, CSS, PostgreSQL, Knex, Express, Nodejs, Heroku, Netlify

- It works only for one face in the image.

[The Color App](#)   React, JSS, Material UI,
- A cross between flatuicolors and materialuicolors.
- Users can copy colors from palettes and create new color palettes, can also make colors lighter and darker by using the slider.
- When creating palettes one can also drag colors around and sort them however they like.
