*Highly motivated **Full Stack Developer** with an **MSc in Computer Science** from UiT and 5+ years of experience specializing in the **MERN stack** (React, Node.js, Express, MongoDB), **PERN stack** (React, Node.js, Express, PostgreSQL) and cross-platform mobile development (**React Native/Expo**). I have a proven track record of delivering scalable web and hybrid mobile solutions. Seeking a challenging role to leverage my technical expertise and local academic background in modern development. **For more projects, please visit the portfolio website linked above.***

Experience

Literate AS

Tromsø, Norway

Full Stack Developer (Contract)

May 2026 – May 2027

- **Frontend Development (React):** Contributing to the Dysmate dyslexia testing platform frontend in **React**, building and maintaining dashboard features for test administration, result visualization, and user workflows.
- **Testing & Quality Assurance:** Writing comprehensive unit tests in **Jest** and end-to-end tests in **Playwright**, ensuring platform reliability and regression prevention across feature releases.
- **Observability & Error Tracking:** Implementing centralized logging and error tracking using **Sentry** for monitoring, debugging, and improving application reliability.
- **Full-Stack Contributions:** Contributing to backend services in **Node.js/Express**, utilizing **Knex.js** for database queries, API enhancements, and integration work.
- *Technologies:* React, Node.js, Jest, Playwright, Sentry, Express, Knex.js, REST API, MySQL.

Aido AS

Tromsø, Norway (Hybrid)

Full Stack Developer

July 2021 – April 2026

- **Growth & Stability:** Promoted to a Full-time role in April 2023 following a successful part-time tenure (since July 2021), demonstrating consistent performance and a deep understanding of the platform.
- **Mobile Leadership & Migration:** Leading the end-to-end development of the core Hybrid Mobile App; spearheaded a strategic migration from a **pure React Native CLI** environment to **Expo** to modernize the stack.
- **DevOps & EAS Integration:** Re-engineered the automated **CI/CD** pipeline, transitioning from a **Bitrise/Bitbucket** workflow to **Expo Application Services (EAS)** for more efficient App Store and Google Play deployments.
- **Testing:** Writing unit tests in **Jest** for React components and app logic, ensuring code quality and preventing regressions across releases.
- **Web UI Contribution:** Assisted in front-end enhancements for the Management Web Application (**Django**), utilizing **HTML, CSS, and Bootstrap** to refine UI components.
- *Technologies:* React Native CLI, Expo, EAS, Bitbucket, Sentry, Bitrise, Jest, Django, HTML/CSS, Bootstrap, Amazon.

Linknbit

MERN Stack Developer

Remote

Dec 2020

- **Full-Stack Engineering:** Engineered the **Missoq** e-commerce platform using **TypeScript** across the entire stack, developing a responsive **React** frontend and a scalable **Node.js/Express** REST API.
- **Payments Integration:** Implemented **Stripe** payment checkout, enabling secure card processing and transaction handling for the e-commerce platform.
- **Database design:** Architected a robust **MongoDB** database schema, utilizing TypeScript interfaces to ensure end-to-end type safety and reduce runtime errors.
- **Cloud Deployment** Configured and managed the production environment on **Digital Ocean** for high availability and efficient scaling.
- **Technologies:** React, Context, Node.js, Express, TypeScript, MongoDB, Stripe, SASS, Digital Ocean.

Decklaration

MERN Stack Engineer

Hybrid Pakistan

Jun – Aug 2020

- **Agency Development:** Engineered web applications, backend services, and hybrid mobile solutions for a New York-based design agency.
- **Backend & Database Architecture (Medtigo):** Architected backend services in **Node.js/Express**, implemented secure user data sync from **Zoho** via **OAuth 2.0** and **Passport.js**, and managed **Amazon RDS (SQL)** using **Sequelize**.
- **Payments & Billing (Medtigo):** Implemented **Braintree (PayPal)** payment workflows for healthcare service transactions, including secure checkout handling and payment status tracking.
- **Mobile Development (Medtigo):** Collaborated on the **Medtigo** mobile app in **React Native**.
- **Frontend Engineering (Mertium):** Contributed to the **Mertium** fintech web platform, building responsive UI components in **React** and **TypeScript**.
- **Technologies:** Node.js, Express, Amazon RDS (SQL), Sequelize, Passport.js, OAuth 2.0, Zoho, Braintree (PayPal), React, React Native CLI, Redux, TypeScript, JavaScript, HTML, CSS, Less, Amazon.

Linknbit

Software Engineer

Onsite

Jan 2019 – May 2020

- **React Dashboards:** Built and delivered multiple full-stack admin dashboards in **React**:
 - **Global Aviation System (GAS)** — aviation permit and operations platform. **React** frontend with multi-tab permit wizard, role-based access, and invoicing module; **Node.js/Express** REST API backed by **MySQL/Sequelize**, deployed to **Azure** via CI/CD pipeline. Permit checkout flow scaffolded for **Stripe**.
 - **Sapphire** — modelling platform dashboard with profile/portfolio management; **Node.js/Express** backend with **Stripe** payment integration for bookings.
 - **SmartsAid** — NGO management dashboard backed by **Firebase** for real-time data and authentication.
- **Maps & GIS:** Integrated geospatial and mapping features across web and mobile:
 - **Enterprise Mapping Platform:** Developed interactive geospatial and mapping functionality using **MapLibre GL JS** within a large-scale operational web platform.
 - **SmartsAid / Kyla** — integrated **Google Maps** and React Native geolocation APIs to power proximity-based and location-aware workflows on mobile.
- **Mobile Apps:** Engineered cross-platform mobile applications using **React Native CLI** and **Expo**:
 - **SmartsAid** (NGO) and **Kyla** (Legal) — **Expo** apps with **Node.js** backend, **Firebase** and geolocation integration.
 - **Yogurt App** — consumer mobile app using **React Native CLI** and **Native Base**.
 - **Dokkani.co** — mobile e-commerce with custom **React Native** bridges to **WordPress/WooCommerce** APIs.
- **Technologies:** React, React Native CLI, Expo, Redux, Context, Node.js, Express, MySQL, Sequelize, MongoDB, DynamoDB, MapLibre GL JS, Google Maps, Geolocation, Stripe, Firebase, Material UI, Bootstrap, Native Base, Azure, REST API.

Education

UiT The Arctic University of Norway

Master in Computer Science

Tromsø

2020–2022

KPITB

Amazon Web services - Solutions Architect(Associate) Course, Online

Pakistan

2020

PIAIC

Internet of Things and AI Specialist course,

Pakistan

2019

IMSciences Institute of Management & Sciences Pakistan

Bachelor in Software Engineering

Peshawar

2014–2018

Technical Skills

Specialities: Mobile/Hybrid App Developer and Web Developer

Front-end: React/React-Native, Next Js Redux, Expo, Javascript, Typescript, HTML, CSS,Sass, Bootstrap, Material UI, Tailwind

Back-end: Node.js, Express, Mongoose, Sequelize, Python, Django, Firebase,DynamoDB, S3 bucket, MongoDB, MySQL, PostgreSQL, Serverless functions.

Tools & Platforms: Git, Sanity, OAuth, Heroku, Netlify, Digital Ocean, Amazon cloud, Azure, Rest API, GraphQL, Bash, Xcode, Android Studio, ChatGPT, Claude, Github Copilot.

Projects

2026: AI-Driven Luxury E-Commerce (Passion Project)

Architected and engineered a full-stack luxury e-commerce mobile application in **React Native**, **Expo** using **TypeScript** and **Redux Toolkit**. Integrated **Claude LLM (Anthropic)** via function calling to build an **agentic AI system** for natural language product discovery. Implemented a headless architecture using **Sanity CMS**, **Clerk** for secure authentication, and **Stripe** for payment processing, all powered by **Vercel** serverless functions. *Key Achievement:* Built a dynamic GROQ query builder that leverages large language model (**LLM**) reasoning to translate AI conversations into precise database searches. Technologies: React Native, Expo, TypeScript, Redux Toolkit, Claude LLM, Agentic AI, Sanity, CMS, GROQ, Clerk, Stripe, Vercel Serverless.

2022: Nudging based on users preferences using Fitbit (Master Thesis)

Developed a full-stack system to combat global physical inactivity (linked to issues like heart disease and diabetes) by delivering personalized, health-conscious activity recommendations, or "digital nudges," based on user preference and real-time vital data from a **Fitbit API**. Engineered the backend logic in **Python/Flask** to process incoming vital data, generate tailored nudges to achieve minimum required steps, and effectively close the loop between wearable data and user action through a mobile interface. The system was validated by real users, with feedback confirming its effectiveness in urging them toward greater activity. Technologies: Expo, Firebase, Python, Flask, Rest API, Fitbit API, React Native Paper.

2021: Chord: Scalable Peer-to-Peer Lookup (University Project)

Implemented the Chord distributed hash table (DHT) algorithm for a scalable peer-to-peer lookup system, forming the basis for a key-value store prototype. *Key Achievement:* Designed and tested the distributed system logic using **Node.js** and **Python** on the **UiT Cluster**, demonstrating

competence in high-performance and distributed computing environments. Technologies: Node.js, Python, Shell/Bash, Distributed Systems (Paper: <https://dl.acm.org/doi/10.1145/964723.383071>).

2018: *Currency Recognition & Conversion (Bachelor Thesis)*

Designed and implemented a native mobile application to automate the scanning, identification, and valuation of currency notes, providing real-time conversion to USD. Key Achievement: Utilized **OpenCV** for robust computer vision-based currency recognition and integrated a Rest API for current exchange rate data. Technologies: Android, Java, OpenCV, Rest API, MATLAB.

2010: *RuneScape RPG Automation Script (Personal Project)*

Developed an automated script in **Java** to play the RuneScape RPG, focusing on efficient in-game progression and skill leveling (e.g., Fishing Skill). This project demonstrated foundational programming and problem-solving skills by creating an autonomous system.

Hobbies

- Programming (no surprise there!), Music, Video Games, Movies, Reading, Hiking, Gym, Indoor Climbing, Football, Traveling.

Languages

English, Pashto, Urdu	<i>Fluent</i>
Norwegian	<i>Intermediate</i>
